Temperature Sensor

GPS Device

WIRED TEMPERATURE SENSOR

1-Wire temperature sensor could be used to measure temperature in a vehicle or track cargo temperature in a trailer or fridge. Data collected by the GPS tracking device is then transmitted to the vehicle tracking system.

The sensor operate with ±0.5°C accuracy in the temperature range from -40°C to +120°C.

TEMPERATURE SENSOR

- Size 65 x 8 mm
- 64 bit serial code allow multiple devices on 1 wire
- Over voltage protection
- Programmable identification number
- IP67 protection
- Connection 3 pin

CONNECT UPTO 4 SENSORS IN SINGLE DEVICE
